5th February, 1956

Prof. Joshua Lederberg  
Department of Genetics  
University of Wisconsin  
MADISON 6, Wisc.

Dear Dr. Lederberg,

I would like to thank you again for the culture of E.coli K-12 serineless mutant, which enabled us to establish unequivocally the appearance of serine upon alkaline incubation of iodinated polytyrosine.

In connection with a study of the digestion of peptides and polymers containing proline, by various micro-organisms, I would be very grateful to you if you would be as kind as to send me a culture of E.coli K-12 prolineless mutant strain 679-183.

I am really sorry to trouble you with this request, but I hope that it will again enable us to elucidate some facts of interest.

Thanking you in advance,

Cordially yours,  
*Sarah Sarid*
